

Invitation to 16 to 26 year olds with Turner Syndrome

The purpose of this study is to describe the experiences of 16 to 26 year olds with Turner syndrome. This study will provide information on what these young women experience as they manage issues that are important to them during this time of change in their lives.

Anyone with Turner syndrome who is 16 to 26 years old is allowed to be in the study as long as that person can read and write in English, understand what the study is about and make a decision to participate.

If you agree to be in this study, you will be asked personal questions in a private interview with an experienced endocrine nurse.

Are you willing to share your personal story?

For more information, please contact the principal investigator, Kelly Behm, RN, at (407) 455-4986 or kelly_behm@rush.edu.
